4110T SERIES

STOP FACE (PUSH SIDE) MOUNTING

MAXIMUM OPENING

Templating allows 110° with standard track arm, limited to 100° with optional bumper tracks.

Hold-open points at 85°, 90°, 95°, or 100° with hold-open tracks.

Please note that many track style door closers are capable of allowing 180° of door swing. Be aware that the majority of track style closers are at their weakest closing force in the 180° – 130° range. Consult factory for applications where door must swing 180°.

- **Butt Hinges** should not exceed 5" (127 mm) in width.
- **Auxiliary Stop** is recommended at hold-open point or where a door cannot swing 110°. Optional track bumper assembly assists backcheck in cushioning the opening swing of the door. It is not intended to replace an auxiliary stop.
- **Clearance** projects 2-1/4" (57 mm) from face of door.
- **Top Rail** less than 5-1/4" (133 mm) measured from stop, requires PLATE, 4110T-18. Plate requires 2-1/4" (57 mm) minimum.
- **Stop Width** minimum 1-1/4" (32 mm).

Options

- Standard track with bumper, hold-open track, hold-open track with bumper.
- Metal cover.
